

Quick connect Lock&Load

For contact strips replacement

XMUs, Locomotives,
Tramways & Metros

Our Lock&Load option for pantograph is the world's first clicking system for contact strip replacement. This design allows for life-cycle costs reduction as well as increased safety during operation.

KEY BENEFITS

Reduction of contact strips replacement time from 30 minutes to 2 minutes

- Mechanical, pneumatic and electric connection replaced by one clicking system.
- Only one tool required.

Less risks of human mistakes during maintenance

- No need to dismount the pneumatic connection
- No risks of ADD leakage

Safety increased

- Mechanical and electrical connections also covered by Automatic Dropping Device function.
